Resources -Tech and Engineering -Fam/Consumer Sci. -Bus/Information Tech. -Marketing/Entrepren.

- ELL, TAG, Intervention, and Spec. Ed. areas support curriculum with accommodations or modifications in programming and/or curriculum. They should, however, conduct periodic program reviews (not on schedule).
- Diversity, environmental education, education for employment, financial literacy, and computer literacy are infused in all curriculum areas. Each curriculum area will address these areas within their curriculum.
- New courses (new curriculum, change in credits) may be proposed out of cycle and presented to Curriculum Council and School Board each December.
